

Energy Efficient Communities

ENGAGE

HR-RS00131

RSO2.2 - Promoting renewable energy in accordance with Renewable Energy Directive (EU) 2018/2001, including the sustainability criteria set out therein

Project goal is to jointly prepare and develop concept model and implement pilot action for creating EE Communities in cross-border region. All relevant stakeholders will be involved in the project with the emphasis of including local residents of communities involved through the raising awareness campaign, examples of good practice and pilot actions. Project will educate target groups about the concept of energy communities, sustainable energy practices and enhanced community resilience.
